

## Central & Back Office Core Solution

### Style by Colour x Size and Fitting Matrix

With our easy to use interface you can process hundreds of products within minutes. Our style file allows you to repeat and clone product information with a single click of the mouse button.

### Forward & Repeat Order processing

Forward orders can be processed whilst at trade shows or on your return, so when the stock is delivered you simply update the delivery quantities allowing stock to be merchandised as soon as it arrives by keeping track of stock deliveries provides you with accurate 'sell-thru' and any short falls.

### Flexible Barcode Printing & Tagging

With Fashione you can customise your own barcodes to include your own logos, images of the item, add text to include other details of the product such as price, season, description, PLU & cost code.

You can also 'tag' supplier barcode to items so you do not need to print barcodes at all.

### Remote Access and Multi User Operation

With the use of broadband technology you can access the database from your home, on the road and at other locations so you can always know how trade is without being in the shop. Our client access solution allows up to 200 users to perform different tasks at the same time from multiple computers

01257 220 205

*The modular nature of Fashione allows you to choose the functionality of the solution and add-on extra functionality and features as and when you are ready, providing a cost effective approach to a tailored Stock Control solution.*

### Real Time (live) Reporting Analysis

All the data processed and stored on the back office is real time, so if a till or web transaction is carried out fashione updates stock and sales data instantly after each transaction

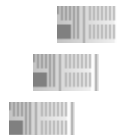

As we have developed our solutions with feed back from our ever growing customer base, we have released a comprehensive range of reports pertinent to the fashion industry.

With Fashione you can also create and customise your own reports using the inbuilt SQL report writer and export to various file formats for use with accountancy packages.

### Step by Step Stock Take Procedure

Performing Stock Takes could not be easier, Fashione has a four-step stock taking process that allows you to trade whilst a count is underway.

Stock counts can be carried out manually or by using a wide range of Barcode Hand Terminals (BHT).

### Price adjustments and Promotions

When you want to run a end of season sale you simply add products to a promotion by season, department, brand etc without re-ticking. For multi branch solutions you can set different prices for different shops or areas even down to a particular size and colour
