

Point of Sale (POS) Solutions

01257 220 205

Fashione Point of Sale solutions provide retailers with accurate, up to the minute, trading data for modern day reporting and analysis. Our clear and easy to use interface is favourable for all levels of computer users.

Simple & Quick Transaction Processing

With our easy to use POS interface operators can complete transactions within a few screen or key presses. POS software can be used with Touch Screen terminals or standard PC / Laptop keyboard configurations.

Controlled Cashier Security Levels

Operator login can be carried out with scan cards or cashier codes, different security levels can be assigned to cashiers to restrict or enable specific functions at the Point of Sale.

In Screen Stock Matrix & Item Detail

Whilst at the till point, operators can access stock information at the touch of a button or by scanning an item to check alternative sizes and colours of a particular style. This prevents cashiers from having to leave the Point of Sale area to check stock levels of an item.

Customer Relationship Management

The Customer Tracking module collects information about customer purchases, details such as brand, size, colour and spend can be used for in-house marketing campaigns direct to your own customer base.

Barcoded Credit Notes & Gift Vouchers

Fashione POS can generate Credit notes and Gift vouchers with a unique barcode via the receipt printer. This feature provides an accurate audit of notes & vouchers and ensures notes and vouchers are not re-used or forged

In addition to the tracking module, customer Loyalty (based on spend) can be enabled as an incentive for repeat business from your customers

Other CRM modules including Alterations, Special orders, Accounts, Deposit 'Put-away' service can also be enabled to assist management of your customer service

Multi level, Item & Transaction Discounts

Stock prices beyond promotions can be adjusted whilst a transaction is carried out, individual item discounts or whole transaction discounts can easily be applied to sales if permitted. All manual price adjustments are recorded with reasons and applied to cashiers for reporting and security purposes.

Fully Integrated Chip & Pin Solution

Fashione is certified for use with 'Ocius' integrated (linked) Chip & Pin solutions, this new web-based payment service reduces operating costs compared to conventional PDQ's and ensures correct amounts are debited on card transactions.
